

Formulating enquiry questions

This section is about Urban fieldwork. For Rural fieldwork, see page 107.

- 1 (a) State the stage of the enquiry process that includes case studies and theories that help with explanations.

(1 mark)

Guided

- (b) Explain what should be included in the evaluation stage of the enquiry process.

The evaluation stage should include a review of the data collection methods

(2 marks)

- 2 Study Figure 1.

Figure 1 A street in an inner city area

Some students intended to carry out fieldwork in the street shown in Figure 1 to investigate the enquiry question: 'How does the quality of the urban environment vary along a transect in an inner city area?'

- (a) Suggest a method they might use to collect quantitative data.

(1 mark)

- (b) Explain the factors you would consider when designing a recording sheet to collect this data.

(3 marks)

- (c) Explain one reason why the street shown in Figure 1 might not be a suitable location to investigate this enquiry question.

(2 marks)
